### Automatic technical analysis. Medium term, Jan 28, 2020 ?

OMX Copenhagen 25 GI shows strong development within a rising trend channel in the medium long term. Rising trends indicate that the market experiences positive development and that buy interest among investors is increasing. The price has risen strongly since the positive signal from rectangle formation at the break through the resistance at 1232. The objective at 1301 is now met, but the formation still gives a signal in the same direction. There is no resistance in the price chart and further rise is indicated. In case of a negative reaction, the index has support at approximately 1230 points. The index is overall assessed as technically positive for the medium long term.

**Recommendation one to six months: Positive (Score: 92)**

Period <span style="font-size: small;">?</span>	Vol.bal.	Volatility	Liquidity	+/- %

**Learn more about key technical aspects of this stock:**

*Support and resistance*

**Price above support**

The price is above a support level, where the stock has previously turned upwards. Many investors may consider it cheap if it falls towards support again, and may then wish to buy.

*Price formation*

**Buy signal from rectangle formation**

A buy signal from a rectangle formation signals increasing optimism among investors and signals that the stock continues or enters a rising trend.

*Trend*

**Rising trend**

Rising trends indicate that the company experiences positive development and increasing buy interest among investors.
